Thank you for renting inflatable entertainment from **A Bouncing Fun Time!**

We pride ourselves on giving our customers the most time with the rented unit. To do this we often deliver and set up the day before your event and/or pick it up the day after your event.

To be able to maintain this commitment to our customers and to reduce the chances of mold or mildew in the units, we need your help protecting our equipment. For this reason, if there is ANY chance of rain or dew, your unit will be installed with a tarp over top of it.

Please follow these instructions when it is time for you to use the inflatable (before turning on the blower).

1. Unhook the bungee cords from the spikes on one side.
2. Pull the tarp back to the still connected side.
3. Tuck the tarp under the unit to keep it from interfering with your participants or event.
4. Turn on the blower and HAVE FUN!

When you are finished having fun or if it starts to rain, follow these instructions.

1. Turn off the blower.
2. Allow for the unit to deflate. You may loosen the connection at the blower to quicken the deflation process.
3. Put the tarp over the inflatable unit and re-secure it.
4. Check and ensure that all corners are attached to anchor points with the bungee straps.

If we arrive to pick up the unit and the tarp has not been placed back over the unit, and it has rained or collected dew, we will assess the \$100 cleaning fee per the rental agreement contract.

Thank you for your cooperation!!!
